

SamBox.io Oracle Compliance Analysis® enables you to calculate and optimize your Database (incl. options) licensing position, on your own. The dedicated compliance and optimization engine covers all licensing models as well as contract dependencies, and delivers reliable results, adapted to real-world situations (audits, ULA exit study of opportunity, and declaration...), and is daily used by large organizations to take the smartest moves and decisions on Oracle licensing.

BENEFITS

- ◆ Full web service - No installation required
- ◆ Easy end-to-end customer journey, on your own
- ◆ Guaranteed data security
- ◆ Compliance results fully reliable and immediately enforceable against Oracle*
- ◆ All Database / Management Pack / Options rules embedded and continuously updated in the compliance engine
- ◆ All environments and virtualization technologies (x86 with VmWare, HyperV...) or Hard partitioning on Unix (IBM LPAR, HP-UX IVM, Sun, Solaris...)
- ◆ Best-in-class algorithms aiming at minimizing as much as possible residual licenses shortages and maximizing unused licenses on shelf, 100% in customer interests
- ◆ Support provided by real human-being Oracle Licensing experts
- ◆ Designed by Elee, non-conflicted company, 100% on customer side*

KEY FEATURES

◆ DATA COLLECTION

- Interfacing & automation capabilities with discovery tools, including LMS scripts
- Simplified Data model implemented in an easy-to-use Excel template, that can be shared within your organization for collaborative work
- Support / help provided all along the data collection journey
- Listing of adapted queries applicable to mainstream market discovery and inventory tools, to ease data collection

◆ DATA QUALITY

- Immediate view of Data quality audit and validity ratios, to ensure that the following compliance analysis will be as reliable as possible
- Step-by-step help and guide to improve data quality to be ready to proceed to compliance calculation
- Error reporting directly within the Excel spreadsheet to ease the edition / modification and improvement of data quality

◆ ORACLE COMPLIANCE CALCULATION

- Compliance calculation in seconds
- Management of usage rights and restrictions (core factors, minima rule, soft partitioning scope of application depending on vCenter & specific agreements)
- Auto-decision of best allocation scheme, when multiple types of licenses can cover same deployment (NUP versus CPU), while considering current entitlement (lowest complementary purchases as possible, highest still-on-shelf value)
- Ability to test new infrastructure configuration and measure the impact on compliance
- Quantification of missing licenses, directly in license type and metric being currently sold in the market (Eof Sale policy taken into account)
- Listing of all allocations for each license related to each target (on instance, on physical server, on VM, on cluster, ...)
- Excel-exportable results

ORACLE LICENSES SUPPORTED BY SAMBOX.IO

Database Products:

- **Editions:** Enterprise, Std, Std 1, Std 2, Express
- **Mgmt Pack & Options:** Diag Pack, Tuning Pack, DB Lifecycle Mgmt pack, configuration mgmt. pack, change mgmt. pack, cloud mgmt. pack, Data masking pack, Data Masking and subnetting pack, Provisioning and Patch Automation pack, Test Data Mgmt pack, Multitenant, RAC, RAC One Node, ADG, OLAP, Partitioning, RAT, Advanced compression, Advanced Security, Label Security, Database Vault, GoldenGate, In-Memory, Advanced analytics, Airlines Data Model, Communications Data Model, Retail Data Model, Spatial, Spatial and Graph, TimesTen Application-Tier DB Cache, Utilities Data Model

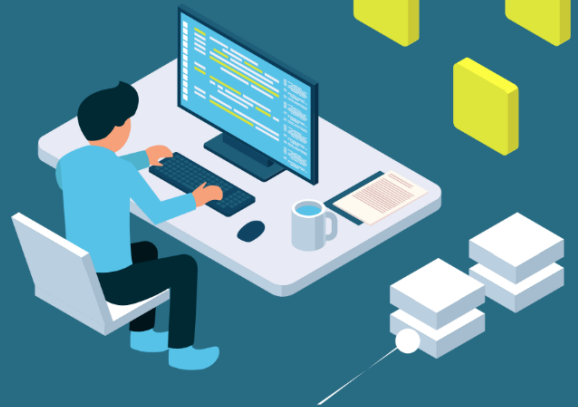

Metrics: NUP, Processor (with various minima rules)

vCenter: 5.0, 5.1, 5.5, >=6.0

Use Cases: Failover, batch... Full Use, ASFU or FUDA

ONLINE SOFTWARE ASSET MANAGEMENT

Connect with main discovery tools, and immediately compute and optimize your compliance analysis for Microsoft Windows Server, System Center, SQL Server, and for Oracle Database.

Take control over editor audits and reduce your licensing expenses.

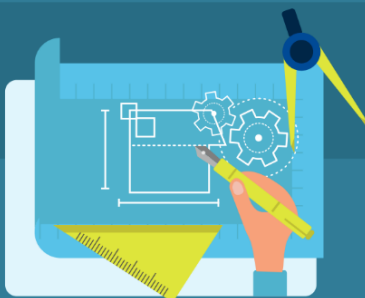

START RIGHT NOW

You can use our mathematical evaluation and optimization tools directly from your web browser, in self-service. They guide you step by step through your compliance assessment. You are fully autonomous and can start right away, without having to install anything.

GET HELP FROM EXPERTS

You benefit from the assistance of our specialized consultants throughout your entire project. We are accessible by live chat, email, phone calls or video to guide you; from the day your order to the interpretation of your final compliance report.

PAY AS YOU GO

You only pay for what you need, and when you need it. Only your infrastructure that is really concerned is invoiced. Our formulas are non-binding, and we accept payments by credit card, SEPA direct debits and international transfers.

PROTECT YOUR DATA

Your data remains secure. We follow high security standards for our entire infrastructure, including HTTPS encryption of exchanges, compliance with OWASP Top 10 recommendations and encryption of our disks.
