ONLINE SOFTWARE ASSET MANAGEMENT

Connect with main discovery tools, and immediately compute and optimize your compliance analysis for Microsoft Windows Server, System Center, SQL Server, Oracle Database & Middleware, and SAP.

Take control over editor audits and reduce your licensing expenses.

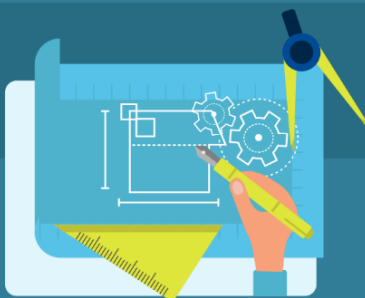

START RIGHT NOW

You can use our mathematical evaluation and optimization tools directly from your web browser, in self-service. They guide you step by step through your compliance assessment. You are fully autonomous and can start right away, without having to install anything.

GET HELP FROM EXPERTS

You benefit from the assistance of our specialized consultants throughout your entire project. We are accessible by live chat, email, phone calls or video to guide you; from the day your order to the interpretation of your final compliance report.

PAY AS YOU GO

You only pay for what you need, and when you need it. Only your infrastructure that is really concerned is invoiced. Our formulas are non-binding, and we accept payments by credit card, SEPA direct debits and international transfers.

PROTECT YOUR DATA

Your data remains secure. We follow high security standards for our entire infrastructure, including HTTPS encryption of exchanges, compliance with OWASP Top 10 recommendations and encryption of our disks.
