

**SamBox.io SQL Server Compliance Analysis®** enables you to calculate and optimize your SQL Server licensing position, on your own. The service is powered by a dedicated compliance and optimization engine, covering all licensing models and contract dependencies. Our engine delivers reliable results, adapted to real-world situations (audits, true-up, contract renegotiation strategy...), and is daily used by large organizations to take the smartest moves and decisions on SQL Server licensing.

## BENEFITS

- ◆ Full web service - No installation required
- ◆ Easy end-to-end customer journey, on your own
- ◆ Guaranteed data security
- ◆ Compliance results fully reliable and immediately enforceable against Microsoft\*
- ◆ All SQL Server and Services licensing rules embedded and continuously updated in the compliance engine
- ◆ Best-in-class algorithms aiming at minimizing as much as possible residual licenses shortages and maximizing unused licenses on shelf, 100% in customer interests
- ◆ Support provided by real human-being Microsoft Licensing experts
- ◆ Designed by Elee, non-conflicted company, 100% on customer side\*
- ◆ Best value for money in the SAM tooling market

## KEY FEATURES

### ◆ DATA COLLECTION

- Simplified Data model implemented in an easy-to-use Excel template, that can be shared within your organization for collaborative work
- Support / help provided all along the data collection journey
- Listing of adapted queries applicable to mainstream market discovery and inventory tools, to ease data collection
- Coming soon: connectors to market discovery and inventory tools

### ◆ DATA QUALITY

- Immediate view of Data quality audit and validity ratios, to ensure that the following compliance analysis will be as reliable as possible
- Step-by-step help and guide to improve data quality to be ready to proceed to compliance calculation
- Error reporting directly within the Excel spreadsheet to ease the edition / modification and improvement of data quality

### ◆ SQL SERVER COMPLIANCE CALCULATION

- Includes all major SQL Server Services components
- Compliance calculation in seconds or minutes
- Management of usage rights (downgrade rights, contract restriction, ...)
- Management of restrictions (limitation of VM numbers or license mobility, SA benefits, core factors, ...)
- Cloud Provider (AWS, Azure...) Bring Your Own Licenses (BYOL) rules management
- Auto-decision of best allocation scheme, when multiple types of licenses can cover same deployment (various metrics, editions, versions, license mobility or not...)
- Auto-decision of best allocation scheme while taking into account current entitlement (lowest complementary purchases as possible, highest still-on-shelf value)
- Ability to test new infrastructure configuration and measure the impact on compliance
- Quantification of missing licenses, directly in license type and metric being currently sold in the market (in the event you would still have to purchase some missing licenses in the end for True Up purposes prior to / or at the end of an audit)
- Listing of all allocations for each license related to each target (on instance, on physical server, on VM, on cluster, ...)
- Excel-exportable results

## SQL SERVER LICENSES SUPPORTED BY SAMBOX.IO

**SQL Versions: 2019, 2017, 2016, 2014, 2012, 2008 R2, 2008, 2005, 2000**

- **SQL Editions:** Datacenter (2008 R2), Business Intelligence (2012 > 2014), Standard (2000+), Enterprise (2000+)
- **SQL Metrics:** Server+CAL, 1-Proc, 2-Cores-Pack
- **SQL Server Services :** Analysis, Data Quality, Integration, Master Data, Notification, Reporting

## ONLINE SOFTWARE ASSET MANAGEMENT

Connect with main discovery tools, and immediately compute and optimize your compliance analysis for Microsoft Windows Server, System Center, SQL Server, and for Oracle Database & Middleware.

Take control over editor audits and reduce your licensing expenses.

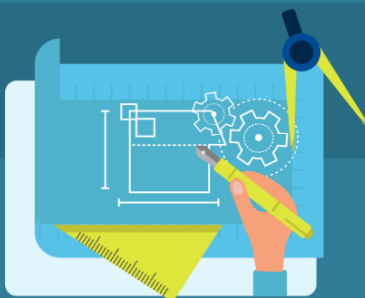

### START RIGHT NOW

You can use our mathematical evaluation and optimization tools directly from your web browser, in self-service. They guide you step by step through your compliance assessment. You are fully autonomous and can start right away, without having to install anything.

### GET HELP FROM EXPERTS

You benefit from the assistance of our specialized consultants throughout your entire project. We are accessible by live chat, email, phone calls or video to guide you; from the day your order to the interpretation of your final compliance report.

### PAY AS YOU GO

You only pay for what you need, and when you need it. Only your infrastructure that is really concerned is invoiced. Our formulas are non-binding, and we accept payments by credit card, SEPA direct debits and international transfers.

### PROTECT YOUR DATA

Your data remains secure. We follow high security standards for our entire infrastructure, including HTTPS encryption of exchanges, compliance with OWASP Top 10 recommendations and encryption of our disks.
